FLUTTER DEVELOPER

Full Stack Flutter Developer with 2 years of experience building and shipping production-grade mobile and web applications using Flutter, React.js, Node.js, Firebase, and MongoDB. Skilled in scalable system design, cross-platform architecture, real-time data handling, and performance optimization. Experienced in building end-to-end digital products from concept to deployment, with proven success in delivering production-ready applications across Android, iOS, and Web platforms.

TECHNICAL SKILLS

- Languages: Dart, JavaScript, C++
- Frameworks: Flutter, React.js
- Backend: Firebase, Node.js
- Database: Firestore, MongoDB
- Tools: GitHub, Postman, Trello
- Services: Google Maps, Mapbox, Resend
- Deployment: Google play, App store, Vercel, Render

PROFESSIONAL EXPERIENCE

- Limenzy Technologies Pvt Ltd | Nov 2025 – Present
- Cotolore Enterprises LLP | May 2024 – July 2025

Skytradr - Ones and 2s – Helicopter Bidding Platform

- Developed a cross-platform helicopter bidding application for Android and iOS using Flutter.
- Implemented real-time bidding system with live status updates and dynamic price tracking.
- Integrated secure authentication, API communication, and backend synchronization.
- Designed responsive UI ensuring smooth performance across devices.
- Managed app builds and deployment configurations for both platforms..

Lend It – Peer-to-Peer Product Lending Marketplace (Canada-Based)

- Developed a cross-platform marketplace app enabling users to lend and borrow products.
- Implemented user listings, search & filter system, booking workflow, and in-app messaging features.
- Integrated authentication, backend APIs, and secure payment handling.
- Designed scalable architecture supporting multi-user transactions and real-time updates.

Rackt - Warehouse Management System

- Built a warehouse inventory management application for tracking product stock in/out operations.
- Integrated barcode scanner functionality for efficient product identification and real-time updates.
- Implemented stock movement logging, inventory status monitoring, and user role-based access control.
